Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings showing Figures 4a-g were received on 06 May 2004. These drawings have been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gill et al. (6,113,637; cited by applicant).

Gill et al. disclose an artificial disc replacement (ADR) device having a flange 34 and a retaining device 39 for retaining a pair of bone screws 37 in the device (see, e.g., Figs. 1-3 and col. 5, lines 32-39). The retaining device comprises a threaded attachment member. A head flange extends from the threaded attachment member and is abuttingly received against a side of the ADR flange. An outermost portion of the head flange is partially received over a portion of a pair of bone screws or prevent backout.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gill et al. (6,113,637) in view of Michelson (6,139,550).

Gill et al. disclose the claimed invention except for the concave shape and flexibility of the head. Michelson also discloses a device comprising retaining screws, e.g. 25, for bone screws (see, e.g., Figs. 12, 14 and 16 and col. 14, line 47 - col. 15, line 2). The retaining device comprises a convex, flexible head 23 to assist the locking device in riding over the top of a bone screw head to facilitate a surgical procedure. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the device of Gill et al. with a convex, flexible head on the retaining device, in view of Michelson, in order to assist the locking device in riding over the top of the bone screw head and facilitate the surgical procedure. It is noted that upon flexing, the convexity of the head would decrease such that the head would become flatter. The method of claim 8 is inherent in the device of the combination of Gill et al. and Michelson.
